Part of the Silver Maintenance Range

Sterling silver and Silver plated articles will tarnish when left exposed to the atmosphere. This is an exciting and unique range of environmentally friendly products which transforms tarnished silverware.

Purchase with:

- ☞ **Silver Plating Solution** – Instantly plate a layer of PURE silver on heavily worn out silver, or plate silver onto base metals.
- ☞ **Impregnated Cloths and mitts** – Easy method of cleaning silver to restore the original shine

PRECIOUS METALS CLEANING PLATE TECHNICAL INFORMATION

Safety Information:

- For sensitive skin, rubber gloves recommended
- Keep out of the reach of children

Directions

- Place the Nu-shine plate in a suitable non-metallic bowl
- Pour sufficient hot water to cover all the silver and jewellery to be cleaned
- Add one dessert spoon of household soda for every litre of water used and allow to dissolve
- Immerse all the articles to be cleaned in the water ensuring that they are in contact with the plate, either directly or through another article
- Leave for 30 to 60 seconds with occasional movement of the articles. Use a brush to remove the stubborn tarnish and dirt. The tarnish will have disappeared. Do not leave for more than 2-3 minutes.
- Remove the articles, rinse thoroughly with water and dry immediately with a dry cloth
- Clean the plate thoroughly with water after use and dry it with a cloth. Store in the original packaging for future use
- For cleaning bronze, copper or brass, add a large cup full of washing powder with soda crystals
