### Part of the Silver Maintenance Range

Sterling silver and Silver plated articles will tarnish when left exposed to the atmosphere. This is an exciting and unique range of environmentally friendly products which transforms tarnished silverware.

Purchase with:

- ☞ **Silver plating solution** - Transform worn out electroplated articles where the silver has eroded, by plating pure silver on to base metals including, brass, copper, bronze and nickel. The formulation contains pure silver and an anti tarnish agent
- ☞ **Silver Polish** - This product polishes silver articles to give them an instant radiant shine. It also contains an anti-tarnish agent so further tarnishing is delayed
